# **PYROVIEW 640M**

High-resolution infrared camera for measurment in middle temperature range

- ✓ Precise non-contact temperature measurement from 100 °C to 500 °C
- $\checkmark\,$  Uncooled microbolometer array with 640  $\times\,$  480 pixels
- $\checkmark$  Spectral range 3 µm to 5 µm
- $\checkmark\,$  Numerous optics with motor focus
- ✓ Measurement frequency 50 frames per second
- ✓ Gigabit Ethernet interface (1 GBit/s)
- ✓ Large dynamic range and 16-Bit analog digital converter
- ✓ Camera in small housing "compact+" (IP54) or industry protection housing "protection" (IP65)
- ✓ Integration in customized system solutions including hard- and software adjustment

### Overview

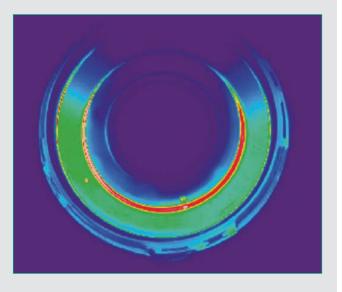

Whether in process monitoring, process automation or quality control in the metal and ceramic industry – the infrared camera PYROVIEW 640M measures temperatures without contact exactly and reliably. The camera is specifically suitable for univeral measurements in the middle temperature range from 100 °C to 500 °C. Also in very fast processes or at temperature changes the data acquisition happens in real-time. For a high measurement accuracy the spectral range of the camera is optimally adjusted to measurement objects.

In stationary industrial continuous operation measurement data is recorded with high spatial resolution on fixed or moving measurement objects. In this way production processes are monitored and controlled efficiently. Therefore the Gigabit Ethernet interface guarantees a data acquisition without loss and with no appreciable time delay up to 50 images per second. The maximum image frequency of 50 Hz is adjusted optimally to the thermal time constant of the infrared array.

Numerous motor focus infrared lenses, including wide angle and telephoto lenses, provide a flexible adjustment to different measurement object sizes at different measurement distances.

The infrared camera is either built in a small aluminium housing "compact+" or in a stainless steel industry protection housing "protection" that has a protection window, an air purge unit and an optional watercooling. The camera observes the production in stand-alone operation without any connected computer via two galvanically isolated digital inputs and outputs. All process parameters of the stand-alone version are programmed once on location via PC connection.

The modular Windows software PYROSOFT of the camera can be adjusted and extended to process-related requirements. The free software PYROSOFT Compact is delivered with every PYROVIEW infrared camera.

### Made by DIAS Infrared

DIAS Infrared headquartered in Dresden (Germany) develops and manufactures high-quality precision devices as well as system solutions for non-contact temperature measurement. Challenging projects are a welcoming motivation for us. The customers appreciate the robust make, outstanding accuracy, superb reliability and the high service standard of our equipment technology.

# **PYROVIEW 640M**

High-resolution infrared camera for measurment in middle temperature range

Technical data			
Device type	640M compact+ 640M protection		
Spectral range <sup>1</sup>	3 μm to 5 μm		
Temperature ranges <sup>1</sup>	range 1: 100 °C to 300 °C, range 2: 200 °C to 500 °C		
NETD <sup>2,3</sup>	< 0,5 K (200 °C, 50 Hz)		
Aperature angle <sup>4</sup> (HFOV $\times$ VFOV)	$25^{\circ} \times 19^{\circ}$ , optional: $75^{\circ} \times 60^{\circ}$ , $59^{\circ} \times 46^{\circ}$ , $43^{\circ} \times 33^{\circ}$ , $12^{\circ} \times 9^{\circ}$ (optics with motor focus)		
Sensor	uncooled microbolometer array (640 $\times$ 480 pixels)		
Measurement uncertainty <sup>3</sup>	2 % of measured value °C		
Measurement frequency <sup>5</sup>	internal 50 Hz, selectable: 50 Hz, 25 Hz, 12,5 Hz,		
Response time	internal 40 ms , selectable	: 2/measurement frequency	
Interfaces	Gigabit-Ethernet (real-time, 50 Hz), galvanically isola	ted digital inputs (trigger) and digital outputs (alarm)	
Connectors	round plug connector HR10A (12 pin, power supply, digital inputs and outputs), round plug connector M12A (Ethernet)	round plug connector M23 (16 pin, power supply, digital inputs and outputs), round plug connector M12A (Ethernet)	
Power supply	12 V to 36 V D	C, typical 10 VA	
Weight	approx. 1.6 kg	approx. 4.2 kg	
Housing	aluminium compact housing IP54, 65 mm (L) × 160 mm (W) × 79 mm (H), without lens and connectors, optional with weather protection housing with pan-tilt-unit	industry protection housing IP65, stainless steel, with protection window, air purge and optional water cooling diameter 110 mm, length 280 mm (without mechanical mounting and connectors), 6 bar max. water pressure, 2 bar max. air pressure	
Operating temperature of the camera	-10 °C to 50 °C	<ul> <li>-10 °C to 50 °C (without water cooling),</li> <li>-25 °C to 150 °C (with water cooling)</li> </ul>	
Storage conditions	–20 °C to 70 °C, ma	ax. 95 % rel. humidity	
Software	control and imaging software PYROSOFT for Windows ®, customized modifications on request		
Scope of delivery	infrared camera PYROVIEW 640M, calibration certificate, manual, software PYROSOFT Compact		
<sup>1</sup> Others on request. <sup>2</sup> Noise equivalent te	mperature difference. <sup>3</sup> Specifications for black body radiator and ambient temp	perature 25 °C. <sup>4</sup> Lens with motor focus.	

<sup>5</sup> Export version with < 9 Hz available.

# PYROSOFT

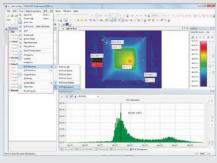

# Powerful online and offline software for DIAS infrared cameras

# **PYROSOFT** Compact

- Online data acquisition of one DIAS infrared camera
- Open and edit archived measured data and sequences
- Bitmap and video export
- Online data storage and online bitmap export
- Definition of regions of interests (ROI): points, lines and rectangle
- Generating of reports in Microsoft® Word format by integrated report function
- Context-sensitive help system (F1 key)
- Included in the scope of delivery of every PYROVIEW infrared camera

## **PYROSOFT Professional**

- Online data acquisition Analyze, store and export data in real-time
- Open and edit archived measured data and sequences
- Multi document structure for several documents
- Bitmap, video and text export
- Definition of regions of interests (ROI) and values of interests (VOI) with alarm calculation, histogram and trend chart
- Numerous interface possibilities for processes (PROFIBUS, PROFINET, WAGO, TCP-Socket, Text IO)
- Reporting function, context-sensitive help system (F1 key)
- PYROSOFT Professional IO offers optionally a bidirectional data interface via PROFIBUS, PROFINET, WAGO, MODBUS, OPC, TCP Socket to process control systems, controllers and other applications

For users who want to make an integration into their software environment by themselves, we offer an own online and offline DLL interface for DIAS infrared cameras.

- $\bullet$  API (DLL) for direct data access under Windows  $\ensuremath{\mathbb{R}}$
- Support for DIAS IRDX file format
- Setting of data acquisition parameters and object properties
- Query of temperature values and camera information
- Functions for displaying of images and palettes as bitmap
- Online and offline function

More software packages are available, for example:

PYROSOFT MultiCam (process software for monitoring up to 8 cameras), PYROSOFT CamZone (software for programming a stand-alone camera), application specific software like PYROSOFT FDS for DIAS fire detection systems.
